COMMONWEALTH OF MASSACHUSETTS EXECUTIVE OFFICE OF ENVIRONMENTAL AFFAIRS DEPARTMENT OF ENVIRONMENTAL PROTECTION

TITLE 5 OFFICIAL INSPECTION FORM – NOT FOR VOLUNTARY ASSESSMENTS SUBSURFACE SEWAGE DISPOSAL SYSTEM FORM PART A CERTIFICATION

Owner's Name: PAUL PERRY
Owner's Address: 177 WILLIAMS RE
CONCORD, MA 01742
Date of Inspection: 12/02/03
Name of Inspector: (please print) . NATHAN TORRETTI
Company Name: CLEAN SEPTICS
Mailing Address: P.O. BOX 394
LUDLOW, MA
Telephone Number: 583-2138
CERTIFICATION STATEMENT
I certify that I have personally inspected the sewage disposal system at this address and that the information reported below
is true, accurate and complete as of the time of the inspection. The inspection was performed based on my training and
experience in the proper function and maintenance of on site sewage disposal systems. I am a DEP approved system
inspector pursuant to Section 15.340 of Title 5 (310 CMR 15.000). The system:
Passes
Conditionally Passes
Needs Further Evaluation by the Local Approving Authority
Fails
on and
Inspector's Signature: Nathon Torrette Date: 12/2/2003
Inspector of Signatures
The system inspector shall submit a copy of this inspection report to the Approving Authority (Board of Health or DEP)
within 30 days of completing this inspection. If the system is a shared system or has a design flow of 10,000 gpd or greater,
the inspector and the system owner shall submit the report to the appropriate regional office of the DEP. The original
should be sent to the system owner and copies sent to the buyer, if applicable, and the approving authority.

This report only describes conditions at the time of inspection and under the conditions of use at that time. This inspection does not address how the system will perform in the future under the same or different conditions of use.

CERTIFICATION (continued)

Property Address: 59 HEATHER STONE RD
_ AMHERST, MA
Owner:PERRY_
Date of Inspection:12/2/03
D. System Failure Criteria applicable to all systems:
You must indicate "yes" or "no" to each of the following for all inspections:
Yes No
Yes No Backup of sewage into facility or system component due to overloaded or clogged SAS or cesspool Discharge or ponding of effluent to the surface of the ground or surface waters due to an overloaded or clogged SAS or cesspool
Static liquid level in the distribution box above outlet invert due to an overloaded or clogged SAS or cesspool
Liquid depth in cesspool is less than 6" below invert or available volume is less than ½ day flow
Required pumping more than 4 times in the last year NOT due to clogged or obstructed pipe(s). Number of
times pumped
Any portion of the SAS, cesspool or privy is below high ground water elevation.
Any portion of cesspool or privy is within 100 feet of a surface water supply or tributary to a surface water supply.
Any portion of a cesspool or privy is within a Zone 1 of a public well.
Any portion of a cesspool or privy is within 50 feet of a private water supply well.
Any portion of a cesspool or privy is less than 100 feet but greater than 50 feet from a private water supply we with no acceptable water quality analysis. [This system passes if the well water analysis, performed at a DEP certified laboratory, for coliform bacteria and volatile organic compounds indicates that the well is free from pollution from that facility and the presence of ammonia nitrogen and nitrate nitrogen is equal to or less than 5 ppm, provided that no other failure criteria are triggered. A copy of the analysis must be attached to this form.]
YES No) The system fails. I have determined that one or more of the above failure criteria exist as described in 31 CMR 15.303, therefore the system fails. The system owner should contact the Board of Health to determine
what will be necessary to correct the failure.
E. Large Systems:
To be considered a large system the system must serve a facility with a design flow of 10,000 gpd to 15,000 gpd. You must indicate either "yes" or "no" to each of the following:
(The following criteria apply to large systems in addition to the criteria above)
yes no
the system is within 400 feet of a surface drinking water supply
the system is within 200 feet of a tributary to a surface drinking water supply
the system is located in a nitrogen sensitive area (Interim Wellhead Protection Area – IWPA) or a mapped Zone II of a public water supply well
If you have answered "ves" to any question in Section F the system is considered a significant threat or answered "ves" in

If you have answered "yes" to any question in Section E the system is considered a significant threat, or answered "yes" in Section D above the large system has failed. The owner or operator of any large system considered a significant threat under Section E or failed under Section D shall upgrade the system in accordance with 310 CMR 15.304. The system owner should contact the appropriate regional office of the Department.

Property Address: _59 HEATHER STONE RD
AMHERST, MA Owner:PERRY_
Date of Inspection:12/2/03
Check if the following have been done. You must indicate "yes" or "no" as to each of the following:
Yes No
A Pumping information was provided by the owner, occupant, or Board of Health
Were any of the system components pumped out in the previous two weeks?
Has the system received normal flows in the previous two week period?
Have large volumes of water been introduced to the system recently or as part of this inspection ?
Were as built plans of the system obtained and examined? (If they were not available note as N/A)
Was the facility or dwelling inspected for signs of sewage back up?
Was the site inspected for signs of break out ?
Were all system components, excluding the SAS, located on site ?
Were the septic tank manholes uncovered, opened, and the interior of the tank inspected for the condition of the baffles or tees, material of construction, dimensions, depth of liquid, depth of sludge and depth of scum?
Was the facility owner (and occupants if different from owner) provided with information on the proper maintenance of subsurface sewage disposal systems?
The size and location of the Soil Absorption System (SAS) on the site has been determined based on:
Yes no
Determined in the field (if any of the failure criteria related to Part C is at issue approximation of distance is unacceptable) [310 CMR 15.302(3)(b)]
