Epi:

I am working with Larry and other department staff to resolve a dispute about a proposed building lot on Potwine and need to find out about any/all requirements the BOH may have relative to sewer connections. In short, the owner is trying to decide what is financially feasible for him- a septic system or running a new sewer line to the existing line. Bonnie mentioned that there might be a requirement to connect if your house is X number of feet from an existing sewer. Can you provide me with this information right away. Thank you.

Dave
