Liz,

Attached is location map in the records that you dropped. Just take two tape measures, pull tight from opposite corners as shown and dig out cover at 1 st and 3rd septic tank location and the D. box where the trenches start. I cant tell from the record how deep they will be.

Looks like Thursday the 13th at 2:00 pm. works.

Alan

Hi Alan,

We just had the septic tank pumped out last month (May), so I'm hoping we won't have to do that again. Do you think this will be recently enough?

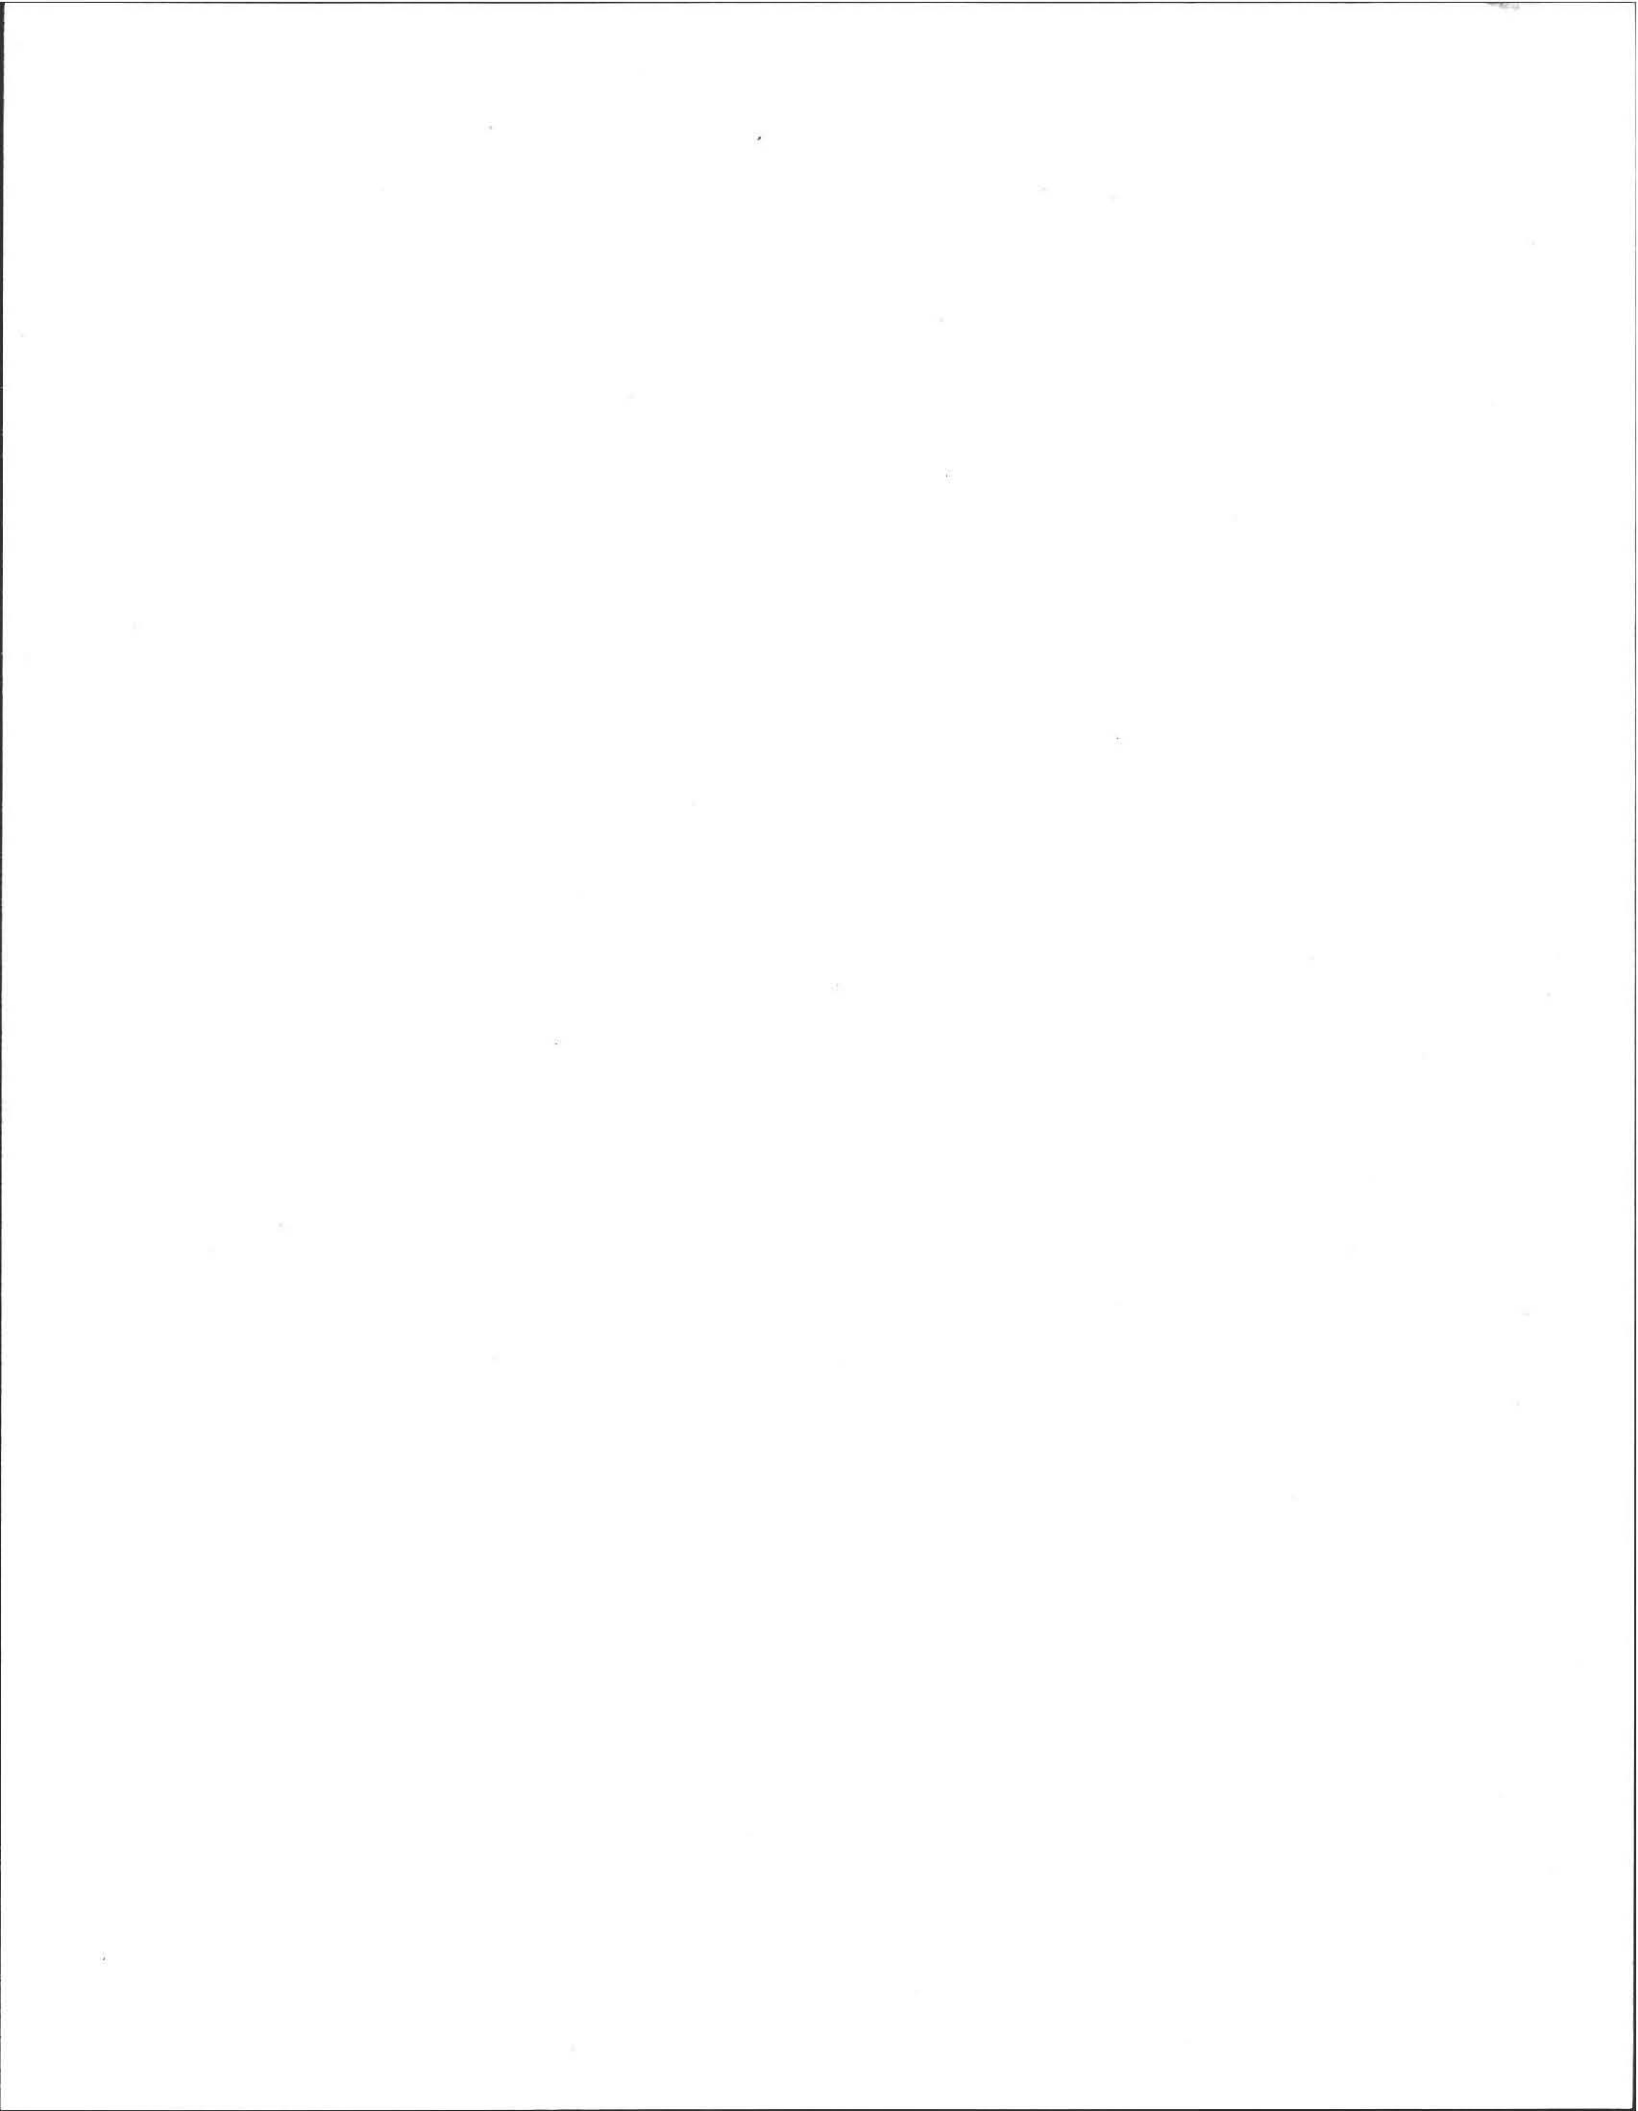

I'm fine with digging four holes, but I need to know exactly where they should be, and I gave you our map of the system, so we may need to coordinate on that. Are you finished looking at the paperwork? If so, can you send it back and indicate where we need to dig?

Please let me know when you expect to come to the house with the Town Inspector, so we can make sure to have the holes dug by then.

Thanks,  
Liz Garland

Elizabeth,

If you know what you are doing its fine there are four holes to dig, 3 at the septic tank and one at the distribution box, we will also have to set up a pumper company anyhow (depending on how long since last pumped) when I and the Town inspector show up.

Let me know. (i have copied Ed Smith at Amherst Health Dept to get this scheduled).

Best,

Alan Weiss

Hi Alan,

I just wanted to check in to see when you think you can get out here to do our Title V inspection for our house at 237 Shutesbury Rd in Amherst. I dropped off a packet of paperwork (with all the relevant reports and diagrams) at your house in Belchertown last week, so I'm hoping you have everything you need for us to move forward.

When we spoke on the phone you mentioned something about having Karl's Excavating dig out four holes? Is this something we could do ourselves? We normally dig out the cover for emptying the system, so if we know where to dig, we might be able to do that for you as well.

I look forward to hearing from you,

Elizabeth Garland
