TURNOVER SHEETS

11

Commonwealth of Massachusetts Title 5 Official Inspection Form Subsurface Sewage Disposal System Form - Not for Voluntary Assessments

Owner information is required for every page.

11 Wildflower Drive, Amherst, MA
Property Address
Satoshi & Mariko Yamamura
Owner's Name
Amherst MA 01002 01.31.2008
City/Town State Zip Code Date of Inspection

Inspection results must be submitted on this form. Inspection forms may not be altered in any way.

Important:
When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

A. General Information

1. Inspector:

Alan E. Weiss
Name of Inspector
Cold Spring Environmental, Inc
Company Name
350 Old Enfield Road
Company Address
Belchertown MA 01007
City/Town State Zip Code
413.253.5916 RS # 933 (Since 1985)
Telephone Number License Number

B. Certification

I certify that I have personally inspected the sewage disposal system at this address and that the information reported below is true, accurate and complete as of the time of the inspection. The inspection was performed based on my training and experience in the proper function and maintenance of on site sewage disposal systems. **I am a DEP approved system inspector pursuant to Section 15.340 of Title 5 (310 CMR 15.000).** The system:

- Passes Conditionally Passes Fails
 Needs Further Evaluation by the Local Approving Authority

Inspector's Signature 01.31.2008
Date

The system inspector shall submit a copy of this inspection report to the Approving Authority (Board of Health or DEP) within 30 days of completing this inspection. If the system is a shared system or has a design flow of 10,000 gpd or greater, the inspector and the system owner shall submit the report to the appropriate regional office of the DEP. The original should be sent to the system owner and copies sent to the buyer, if applicable, and the approving authority.

*****This report only describes conditions at the time of inspection and under the conditions of use at that time. This inspection does not address how the system will perform in the future under the same or different conditions of use.**

B. Certification (cont.)

Inspection Summary: Check A,B,C,D or E / **always** complete all of Section D

A) System Passes:

- I have not found any information which indicates that any of the failure criteria described in 310 CMR 15.303 or in 310 CMR 15.304 exist. Any failure criteria not evaluated are indicated below.

Comments:

1000 gallon septic tank had good levels and baffles (from 1983). Leachfield/D.box was level and in good condition (32' l x 30' wide) as installed in 2000.

B) System Conditionally Passes:

- One or more system components as described in the "Conditional Pass" section need to be replaced or repaired. The system, upon completion of the replacement or repair, as approved by the Board of Health, will pass.

Answer yes, no or not determined (Y, N, ND) in the for the following statements. If "not determined," please explain.

- The septic tank is metal and over 20 years old* or the septic tank (whether metal or not) is structurally unsound, exhibits substantial infiltration or exfiltration or tank failure is imminent. System will pass inspection if the existing tank is replaced with a complying septic tank as approved by the Board of Health.

* A metal septic tank will pass inspection if it is structurally sound, not leaking and if a Certificate of Compliance indicating that the tank is less than 20 years old is available.

ND Explain:

- Observation of sewage backup or break out or high static water level in the distribution box due to broken or obstructed pipe(s) or due to a broken, settled or uneven distribution box. System will pass inspection if (with approval of Board of Health):

broken pipe(s) are replaced

obstruction is removed

B. Certification (cont.)

B) System Conditionally Passes (cont.):

- distribution box is leveled or replaced

ND Explain:

- The system required pumping more than 4 times a year due to broken or obstructed pipe(s). The system will pass inspection if (with approval of the Board of Health):

- broken pipe(s) are replaced

- obstruction is removed

ND Explain:

C) Further Evaluation is Required by the Board of Health:

- Conditions exist which require further evaluation by the Board of Health in order to determine if the system is failing to protect public health, safety or the environment.

1. System will pass unless Board of Health determines in accordance with 310 CMR 15.303(1)(b) that the system is not functioning in a manner which will protect public health, safety and the environment:

- Cesspool or privy is within 50 feet of a surface water

- Cesspool or privy is within 50 feet of a bordering vegetated wetland or a salt marsh

2. System will fail unless the Board of Health (and Public Water Supplier, if any) determines that the system is functioning in a manner that protects the public health, safety and environment:

- The system has a septic tank and soil absorption system (SAS) and the SAS is within 100 feet of a surface water supply or tributary to a surface water supply.

- The system has a septic tank and SAS and the SAS is within a Zone 1 of a public water supply.

- The system has a septic tank and SAS and the SAS is within 50 feet of a private water supply well.

B. Certification (cont.)

C) Further Evaluation is Required by the Board of Health (cont.):

- The system has a septic tank and SAS and the SAS is less than 100 feet but 50 feet or more from a private water supply well**.

Method used to determine distance: _____

** This system passes if the well water analysis, performed at a DEP certified laboratory, for coliform bacteria indicates absent and the presence of ammonia nitrogen and nitrate nitrogen is equal to or less than 5 ppm, provided that no other failure criteria are triggered. A copy of the analysis must be attached to this form.

3. Other:

D) System Failure Criteria Applicable to All Systems:

You must indicate "Yes" or "No" to each of the following for all inspections:

- Yes No Backup of sewage into facility or system component due to overloaded or clogged SAS or cesspool
- Yes No Discharge or ponding of effluent to the surface of the ground or surface waters due to an overloaded or clogged SAS or cesspool
- Yes No Static liquid level in the distribution box above outlet invert due to an overloaded or clogged SAS or cesspool
- Yes No Liquid depth in cesspool is less than 6" below invert or available volume is less than 1/2 day flow
- Yes No Required pumping more than 4 times in the last year NOT due to clogged or obstructed pipe(s). Number of times pumped: _____
- Yes No Any portion of the SAS, cesspool or privy is below high ground water elevation.
- Yes No Any portion of cesspool or privy is within 100 feet of a surface water supply or tributary to a surface water supply.

B. Certification (cont.)

D) System Failure Criteria Applicable to All Systems (cont.):

Yes No

Any portion of a cesspool or privy is within a Zone 1 of a public well.

Any portion of a cesspool or privy is within 50 feet of a private water supply well.

Any portion of a cesspool or privy is less than 100 feet but greater than 50 feet from a private water supply well with no acceptable water quality analysis. **[This system passes if the well water analysis, performed at a DEP certified laboratory, for fecal coliform bacteria indicates absent and the presence of ammonia nitrogen and nitrate nitrogen is equal to or less than 5 ppm, provided that no other failure criteria are triggered. A copy of the analysis and chain of custody must be attached to this form.]**

The system is a cesspool serving a facility with a design flow of 2000gpd-10,000gpd.

The system fails. I have determined that one or more of the above failure criteria exist as described in 310 CMR 15.303, therefore the system fails. The system owner should contact the Board of Health to determine what will be necessary to correct the failure.

E) Large Systems: To be considered a large system the system must serve a facility with a design flow of 10,000 gpd to 15,000 gpd.

For large systems, you must indicate either "yes" or "no" to each of the following, in addition to the questions in Section D.

Yes No

the system is within 400 feet of a surface drinking water supply

the system is within 200 feet of a tributary to a surface drinking water supply

the system is located in a nitrogen sensitive area (Interim Wellhead Protection Area - IWPA) or a mapped Zone II of a public water supply well

If you have answered "yes" to any question in Section E the system is considered a significant threat, or answered "yes" in Section D above the large system has failed. The owner or operator of any large system considered a significant threat under Section E or failed under Section D shall upgrade the system in accordance with 310 CMR 15.304. The system owner should contact the appropriate regional office of the Department.

C. Checklist

Check if the following have been done. You **must** indicate "yes" or "no" as to each of the following:

- | Yes | No | |
|-------------------------------------|-------------------------------------|---|
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Pumping information was provided by the owner, occupant, or Board of Health |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Were any of the system components pumped out in the previous two weeks? |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Has the system received normal flows in the previous two week period? |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Have large volumes of water been introduced to the system recently or as part of this inspection? |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Were as built plans of the system obtained and examined? (If they were not available note as N/A) |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Was the facility or dwelling inspected for signs of sewage back up? |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Was the site inspected for signs of break out? |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Were all system components, excluding the SAS, located on site? |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Were the septic tank manholes uncovered, opened, and the interior of the tank inspected for the condition of the baffles or tees, material of construction, dimensions, depth of liquid, depth of sludge and depth of scum? |
| <input type="checkbox"/> | <input type="checkbox"/> | Was the facility owner (and occupants if different from owner) provided with information on the proper maintenance of subsurface sewage disposal systems? |

The **size and location of the Soil Absorption System (SAS)** on the site has been determined based on:

- | | | |
|-------------------------------------|--------------------------|--|
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Existing information. For example, a plan at the Board of Health. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Determined in the field (if any of the failure criteria related to Part C is at issue approximation of distance is unacceptable) [310 CMR 15.302(5)] |

D. System Information

Residential Flow Conditions:

Number of bedrooms (design): 4 BR Number of bedrooms (actual): 4 BR

DESIGN flow based on 310 CMR 15.203 (for example: 110 gpd x # of bedrooms): 440 (474)

Number of current residents: 1-2

Does residence have a garbage grinder? Yes No

Is laundry on a separate sewage system? [if **yes** separate inspection required] Yes No

Laundry system inspected? Yes No

Seasonal use? Yes No

Water meter readings, if available (last 2 years usage (gpd)): _____

Sump pump? Yes No

Last date of occupancy: _____
Date

Commercial/Industrial Flow Conditions:

Type of Establishment: _____

Design flow (based on 310 CMR 15.203): _____
Gallons per day (gpd)

Basis of design flow (seats/persons/sq. ft., etc.): _____

Grease trap present? Yes No

Industrial waste holding tank present? Yes No

Non-sanitary waste discharged to the Title 5 system? Yes No

Water meter readings, if available: _____

Last date of occupancy/use: _____
Date

Other (describe): _____

General Information

Pumping Records:

Source of information: 2000 (owner)

Was system pumped as part of the inspection? Yes No

If yes, volume pumped: 1000
gallons

How was quantity pumped determined? Meas.

Reason for pumping: Insp.

Type of System:

- Septic tank, distribution box, soil absorption system
- Single cesspool
- Overflow cesspool
- Privy
- Shared system (yes or no) (if yes, attach previous inspection records, if any)
- Innovative/Alternative technology. Attach a copy of the current operation and maintenance contract (to be obtained from system owner)
- Tight tank. Attach a copy of the DEP approval.
- Other (describe):

Approximate age of all components, date installed (if known) and source of information:

Tank (25 years), field (7.5 years)

Were sewage odors detected when arriving at the site? Yes No

Site Exam:

- Check Slope
- Surface water
- Check cellar
- Shallow wells

Estimated depth to high ground water:

11'+
feet

Please indicate all methods used to determine the high ground water elevation:

- Obtained from system design plans on record

If checked, date of design plan reviewed:

August 2000
Date

- Observed site (abutting property/observation hole within 150 feet of SAS)
- Checked with local Board of Health - explain:

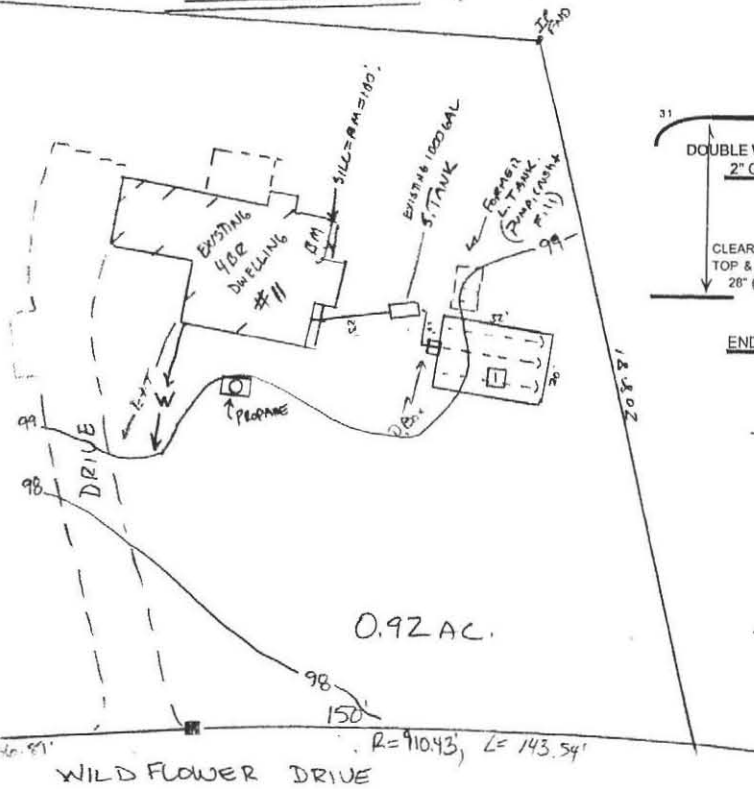

- Checked with local excavators, installers - (attach documentation)
- Accessed USGS database - explain:

You **must** describe how you established the high ground water elevation:

See records, 2000 soil evaluation.

PLOT PLAN

CROSS SECTION OF SEPTIC SYSTEM

NOTE: USE TITLE V FILL ONLY UNDER AND AROUND FIELD TO MEET DESIGN ELEVATIONS AS NOTED ON PLAN AND AS PER 310 15.255 (clear all top and sub prior to fill placement)

DESIGN NOTES:

- 4 BR X 110 GAL/PERSONS/DAY = 440 GAL/DAY
-Use ONE Leachfield 20' wide x 32' LONG W/6" of .5' of DBL washed stone below invert.
Bot. Area: 20' wide x 32' long = 640sf.
Side Area: N.A.
Tot. Area: 640 sf x 0.74 gal.sf. = 474 GAL./day.
- GARBAGE DISPOSAL NOT ALLOWED
- ALL D. BOX OUTLET PIPES LEVEL FOR 2'
- NO PRIVATE WELLS WITHIN 200 FEET OF SAS (town water)
- NO WETLANDS WITHIN 200 FEET OF SAS.
- PRE & POST CONTOURS NOTED AS NECESSARY.
- RESERVE AREA NOT required. (PUMP CRUSH & FILL OLD LEACH TANK)
- SLOPE CALCS (SEE CONTOURS). SUBGRADE INSP. REQ'D.
- 2% MIN. SLOPE OVER SAS. CLEAR TOP AND SUB TO 28" MIN. AS NEEDED. CLEAR TO BASE OF B (MIN. 28") UNDER BED.
- SOIL EVALUATION BY A. WEISS, RS, 8/11/2000.
- DEPTH OF PERC. 44" & BY A. Weiss 8/11/2000 & 32" BY FILIOS IN 1981.
- PERC RATE = <2MIN/MIN, CLASS I SOIL RATING (SAND)
- INSTALL/INSPECT TEES (10" INLET, 14" OUTLET) ON EXISTING 1,000 GAL. S. TANK
- USE CURRENT S. TANK ONLY IF SOUND, UNCOVER & CHECK BAFFLES/TEES IN PLACE.
- USE APPROVED (1 1/2") DBL. WASHED STONE UNDER BED & D. BOX FOR 6". CONFIRM STONE PROPERLY WASHED (WITH BUCKET /H2O TEST) PRIOR TO PLACEMENT.
- NO TREES WITHIN 10 FT. OF NEW LEACH FIELD.
- ENGINEER TO INSPECT SUBGRADE.

AS - BUILT PLAN:

PROPER MAINTENANCE OF YOUR PRIVATE SEWAGE DISPOSAL SYSTEM

1. This system must be inspected periodically and the tank pumped out at an interval not to exceed 3 years.
2. For your protection sanitary pumpers are licensed by the Amherst Board of Health.
3. Regular pumping is crucial to avoid early failure and costly repairs of the system.
4. DO NOT dispose into the system such items as rags, string, sanitary napkins, coffee grounds as they can cause it to clog and fail.
5. Further information can be obtained by contacting your Health Department at 253-7077.
